

# **Keith Casko**

Systems-Focused Software Engineering Student | IT & Website Development

Kalamazoo, MI | [keith.casko@gmail.com](mailto:keith.casko@gmail.com) | [github.com/kcasko](https://github.com/kcasko) | [taurustech.me](https://taurustech.me)

## **Professional Summary**

Systems-focused technology professional with over twenty years of experience in process-driven environments, leadership, and operational problem solving. Strong foundation in Windows and Linux systems administration, automation, and troubleshooting, paired with hands-on website development and deployment for real-world use. Currently pursuing a Bachelor of Science in Software Engineering at Western Governors University. TaurusTech serves as a living workspace documenting systems work, web development, and applied technical projects.

## **Technical Skills**

Languages: Python, Bash, HTML, CSS, JavaScript (working knowledge)

Operating Systems: Windows Server 2022, Windows 11, Ubuntu, Kali Linux

Web & Deployment: Responsive website development, semantic HTML, CSS layout, JavaScript interactivity, Cloudflare hosting, DNS configuration

Infrastructure & Tools: Active Directory, Group Policy, Git, VS Code, VirtualBox, VMware

Focus Areas: Systems Administration, Website Development, Automation, Troubleshooting, Networking Fundamentals, Security Fundamentals

## **Education**

### **Western Governors University (WGU)**

Bachelor of Science in Software Engineering (In Progress)

## **Projects & Technical Work**

### **TaurusTech.me**

Designed, built, and deployed a personal technical workspace using HTML, CSS, JavaScript, and Cloudflare. Developed modular layouts, interactive components, and site logic to document hands-on systems administration, development, and infrastructure work.

### **Website Demo Showroom**

Built and maintain a collection of live website demos for local service-based businesses, focused on mobile-first design, performance, clarity, and conversion.

### **Active Directory Home Lab**

Built and managed a Windows Server 2022 domain environment including users, groups, and Group Policy.

### **Linux Systems & Automation Lab**

Configured and maintained Ubuntu and Kali Linux environments and developed Bash and Python scripts to automate administrative and troubleshooting tasks.

## **Professional Experience**

**Costco Wholesale – Kalamazoo, MI**

*Bakery Production / Team Lead (2003 – 2023)*

Led daily operations for high-volume production teams, trained employees, improved workflows, and was recognized for leadership and problem solving under pressure.
